RANCILIO Classe 5 S 1 Group Tank

Entry-level to Mid range Traditional Espresso Machine

ESPRESSO MACHINE SPECIFICATIONS:

The Classe 5 exemplifies functional minimalism combined with contemporary aesthetics. It features modern side panels, curved group covers and an ergonomic work area for comfort and convenience.

The Classe 5 is the combination of modern style and contemporary art in an espresso machine. Made from brushed stainless steel, ABS and nylon panels, the Classe 5 S has a sleek button for manual dosing control. The Classe 5 comes in Standard or Tank version in Anthracite Black and Ice White.

Discover functional minimalism with the Classe 5.

STANDARD FEATURES:

- Made from brushed stainless steel, ABS and nylon panels
- Pour-over 2-liter water reservoir and drain basin
- Semi-automatic brewing buttons - barista chooses when shot starts and stops
- Independent heat exchangers
- Electrical heating
- Built-in vibrating pump
- Boiler and pump pressure control gauge
- One manual steam wand for frothing and steaming milk
- C-Lever ergonomically designed steam hand features two positions, pulse steam (down) or steam fully on (up)
- Hot water outlet with manual valve knob control
- Scratch-proof polymer drain insert that can be removed and easily cleaned in dishwasher
- Adjustable feet
- 1-year parts warranty

TANK VERSION:

Despite its commercial-grade components and impressive cup quality, the Classe 5 ST1 remains surprisingly portable. Because all water is drawn from the built-in reservoir, only a power connection is required. This makes the Classe 5 ST1 a great solution for a variety of personal and commercial settings.

OPTIONS:

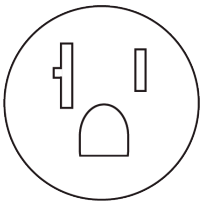
SERVICE CONNECTIONS:

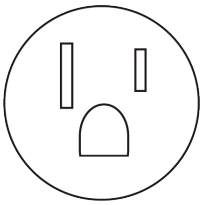
Electrical Connections

1 GROUP Tank

Voltage Range: **110-120 VAC Single Phase**
Watts: **1600 W**
Circuit Size: **15 amps**
Suggested Receptacle: **15a GFI or 5-15R**



15a GFI



5-15R

WATER CONNECTIONS:

No water connection. Pour-over 2-liter water reservoir located on top of the machine that supplies water into the boiler.

WATER QUALITY STATEMENT:

The suggested water hardness level of the water poured in the water reservoir is at 2-3 GPG* at all times.

*17.1 ppm = 1 grain of hardness

Water entering the machine should have a water hardness level of 2-3 GPG at all times. If the water supply is not within this range, a dedicated water softener (if above 3 GPG) or mineral addition cartridge (if below 2 GPG) is required for the coffee machine to operate properly over time (see Rancilio Group North America Water Quality Statement for further details).
