QUICK START GUIDE

# Start Here

## • Features

- Auto-start function heats your water to your chosen temperature at your selected time
- Displays temperature in Fahrenheit or Celsius
- Displays actual water temperature in kettle even when powered off
- Includes preset temperatures for popular hot beverages
- Retains last temperature settings when powered off or unplugged
- Allows user to set and hold water temperature for up to one hour
- Durable 300 Series food grade stainless steel
- Count-up timer feature
- Detachable power cord (in markets outside of North America)

## • What's in the box?

1.2 Liter Stout Spout™ Digital Kettle

Removable Power Cord  
*(In markets outside of North America)*

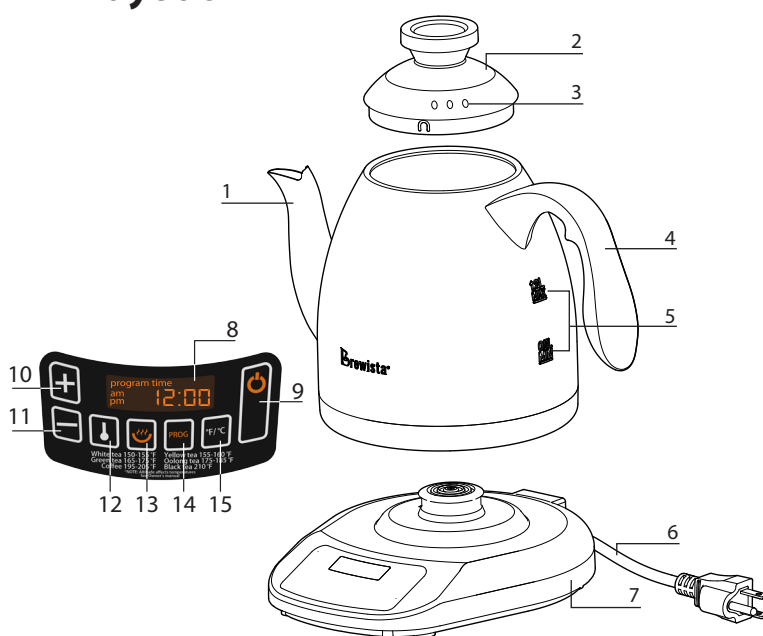

Cafetto™ Descaler

Base

## • Setting Up the Kettle

- Set the base on a flat, steady surface and plug cord into a grounded wall outlet. *(If your kettle has a removable power cord, attach the female end of the power cord to the base first.)*
- Lift off the lid and fill kettle with cold water.

**IMPORTANT!** Do not fill above the “max” fill line (1.2L).

- Return kettle to the base.

## • First Time Use

- Fill the kettle to the Max fill line (1.2 L) (marked inside of kettle) with cold water.
- Replace the lid with holes facing away from the handle.
- Press the ON/OFF button to start boiling automatically.
- Bring water to a boil, then empty the kettle.
- Allow the appliance to cool down for 1 minute.
- Repeat twice before initial use.

## • Setting the Temperature

*(Refer to owner's manual for detailed temperature setting instructions.)*

- Press the °F / °C button to choose either Fahrenheit or Celsius.
- Press the TEMPERATURE SETTING button to choose a preset temperature.
- Press the [ + ] button to increase the temperature by one degree.
- Press the [ - ] button to decrease the temperature by one degree.
- The temperature displayed on the screen will be stored after three (3) seconds.
- Once the temperature is set, it will be stored in memory and will be recalled the next time the kettle is turned on.
- During the heating cycle, the LCD will display the current water temperature.

- To stop the heating process, press the ON/OFF button or remove the kettle from the base.
- To resume heating, return kettle to base and press the “ON/OFF” button.
- When the set temperature is reached, three audible beeps are emitted.

**WARNING:** Never set the temperature above the boiling point. Refer to the “High Altitude Users” section in the owner’s manual to determine the boiling temperature for your altitude.

## • Setting the Current Time

(Refer to owner's manual for detailed time setting instructions.)

- Plug the power cord into the wall outlet. The display will flash "time am 12:00".
- Press the [ + ] button to change the hour.
- Press the [ - ] button to change the minutes.

**Note:** If time stops flashing before current time is set, press and hold the [ + ] button to activate the time change function.

## • Keep Warm Function

- Press the KEEP WARM button.
- The set temperature will be maintained for one hour.
- If the kettle is removed from the base, the Keep Warm feature will deactivate.
- To resume the Keep Warm feature, return kettle to base and press the KEEP WARM button.
- If the Keep Warm feature is not active, the kettle will reach the set temperature and shut off.

## • Auto-Start Function

(Refer to owner's manual for detailed Auto-start setting instructions.)

- Note:** The Auto-start time is the time at which the heating cycle will be complete.
- Press the PROG button once.
  - The current time will flash five times.
  - If it is necessary to adjust the current time;
    - Press the [ + ] button to increase the hour and the [ - ] button to increase the minute of the current time.
  - After a few seconds of inactivity, the current time will be stored, and the LCD will flash the Auto-start time.

- While the Auto-start time is flashing;
  - Press the [ + ] button to increase the hour and the [ - ] button to increase the minute of the Auto-start time.
- After a few seconds of inactivity, the Auto-start time will be stored, and the LCD will flash the programmed temperature setting.
  - Press [ + ] and [ - ] buttons to set desired temperature.
  - The temperature will be stored after a few seconds of inactivity.
- If the Auto-start time and current time are less than 8 minutes apart, heating begins immediately.

## • Count-Up Timer Feature

- Remove the kettle from the base.
- The LCD will display "0:00".
- Press the [ + ] button to start the count-up timer.
- The maximum count-up time is 7 minutes.
- Return the kettle to the base then lift it off again to reset the timer to zero.

## • Washing Instructions

- Remove the kettle from the base.
- Clean the outside of the base and the kettle with a damp, soft cloth or sponge. A bottle brush may be used to clean the interior of the kettle.
- Clean the inside of the kettle with dish detergent and rinse thoroughly with water.
- Do not use abrasive cleaners.
- After cleaning, dry the kettle and the base thoroughly.

**WARNING:** Never immerse the kettle or the base in water or other liquids.

## • Descaling

- When mineral scale builds up in the kettle, it can affect temperature consistency and slow down heating time.
- To ensure optimum performance, Brewista recommends descaling the kettle when mineral build-up is visible inside the kettle.

**Note:** Vinegar may not effectively descale the kettle and can be difficult to thoroughly rinse. Vinegar may also leave behind an odor that could affect future use.

**Brewista recommends using Cafetto™ Descaler.**

### How to use Cafetto™ Descaler:

- Mix 1 packet Cafetto™ Descaler with 40 oz. of lukewarm water.
- Pour the solution into the kettle.
- Bring the solution to a boil.
- Let the vessel cool for 15 minutes, then discard the solution.
- Rinse thoroughly with fresh water.
