**SUPPLY PRESSURE:** 30-70 psi

**HARDNESS:** 2-3 GPG\*

\*17.1 ppm = 1 grain of hardness

Water entering the machine should have a water hardness level of 2-3 GPG at all times. If the water supply is not within this range, a dedicated water softener (if above 3 GPG) or mineral addition cartridge (if below 2 GPG) is required for the espresso machine to operate properly over time (see Rancilio Group North America water quality statement for further details).
