

To feel the love and care that goes into a cup, to take time to ground yourself through an object born from the earth, water and fire...  
 The Bonna Raw Collection pays homage to lightness with its organic and delicate forms. Offering beauty combined with functional simplicity, the Bonna Raw Collection wraps your hands with its embossed lines and adds a stylish decorative signature to your kitchen. Its white colour provides a bright canvas for your favourite beverages.  
 Thanks to its ribbed design, each piece in the product family is lighter than the products on the market. In addition to the coffee cups designed separately for different types of coffee, the dripper planned for the 360° coffee brewing ritual carries the same design identity.  
 Although the designs are inspired by random pattern sketches, natural forms and marine animals, they stand away from visual noise and give you the chance to slow down. As you stand in this colourful jungle full of life, you will feel your mind calm down with Bonna Raw.
